

Figure 1. Age-adjusted death rates of liver cirrhosis by sex (death registration States, 1910–32, and United States, 1933–2000).

* Because there was no information available on deaths by sex for 1910–1913, and 1917, age-adjusted death rates for males and females based on the year 2000 standard population were not calculated for those years.

Data for this figure are presented in columns 5–7 of Table 1 from the source listed below.
